

# BLIZZARD<sup>®</sup> POWER PLOW

**Wings expand and pivot forward to form a scoop!**

## Expanding Hydraulic Wings

The hallmark feature of all Blizzard Power Plow<sup>®</sup> Snowplows are the hydraulic wing extensions. These wings, when fully extended, increase the overall width of the blade from a compact 260 cm (245 cm for 810SS) position to an impressive 340 cm (305 cm for 810SS) WidePass™ position with the touch of a switch.

That's not all! Each wing can also pivot forward up to 40 degrees (30 degrees for 810SS) to produce a 300 cm (285 cm for 810SS) scoop or BucketBlade™ position. Now you can increase your carrying capacity and control snow like never before! Whether you are clearing away heavy accumulations or cleaning up snow trails, the Blizzard Power Plow<sup>®</sup> Snowplow will reduce your operating time dramatically.

## Custom Controller

All Blizzard Power Plow Snowplows come standard with a custom controller package. This ergonomic controller can be mounted to the steer handles of the machine or hand held depending on user preference. With only three easy access toggle switches, the custom controller offers fingertip movement of all blade functions.
